

ELHAM SAJED-CONNOR PSY.D.

CLINICAL PSYCHOLOGIST PSY27665

TELETHERAPY CONSENT FORM

This Teletherapy Consent Form contains important information focusing on tele-therapy using the phone or the Internet. Please read this carefully, and let me know if you have any questions. When you sign this document, it will represent an agreement between us.

(REQUIRED IN THE EVENT TELEHEALTH IS NECESSARY)

Definition of Services:

I, _____, hereby consent to engage in teletherapy with Dr. Elham Sajed-Connor. Tele-therapy is a form of psychological service provided via internet technology, which can include consultation, treatment, transfer of medical data, emails, telephone conversations and/or education using interactive audio, video, or data communications. I also understand that teletherapy involves the communication of my medical/mental health information, both orally and/or visually. Teletherapy has the same purpose or intention as psychotherapy or psychological treatment sessions that are conducted in person. However, due to the nature of the technology used, I understand that teletherapy may be experienced somewhat differently than face-to-face treatment sessions. I understand that I have the following rights with respect to teletherapy:

Client's Rights, Risks, and Responsibilities:

1. I, the client, need to be a resident of California. (This is a legal requirement for psychologists practicing in this state under a CA license.)
2. I, the client, have the right to withhold or withdraw consent at any time without affecting my right to future care or treatment.
3. The laws that protect the confidentiality of my medical information also apply to teletherapy. As such, I understand that the information disclosed by me during the course of my therapy or consultation is generally confidential. However, there are both mandatory and permissive exceptions to confidentiality, which are described in the general Consent Form I received at the start of my treatment with Dr. Elham Sajed-Connor.

4. I understand that there are risks and consequences of participating in teletherapy, including, but not limited to, the possibility, despite best efforts to ensure high encryption and secure technology on the part of my psychologist, that: the transmission of my information could be disrupted or distorted by technical failures; the transmission of my information could be interrupted by unauthorized persons; and/or the electronic storage of my medical information could be accessed by unauthorized persons.

5. There is a risk that services could be disrupted or distorted by unforeseen technical problems.
